

## One platform for every operation

### A SMARTER WAY TO RUN YOUR RECYCLING OPERATION

Bollegraaf ONE is a modular digital customer environment that connects all equipment and sensors within a material recycling facility. It processes operational data, and transforms it into clear insights and actionable recommendations - guaranteeing measurable performance improvements.

Developed by combining Bollegraaf's decades of recycling expertise with advanced AI and data intelligence, Bollegraaf ONE enables smarter decisions across your entire operation.

**Bollegraaf ONE helps recycling plants move from reacting to problems to anticipating them whilst continuously optimizing performance.**

### WHAT THIS MEANS FOR YOU? MORE CONTROL. OPTIMIZED RESULTS.

- ⊞ Reduced downtime
- ⊞ Higher throughput
- ⊞ Improved output quality
- ⊞ Lower maintenance costs
- ⊞ Faster, data-driven decisions
- ⊞ Improved workflow efficiency
- ⊞ Greater operational confidence
- ⊞ Less dependency on individual expertise

**From daily operations to long-term optimization - everything in ONE place.**

### HOW ONE WORKS STEP BY STEP

#### EVOLVE

Automatic feedback looping

#### NAVIGATE

Consultancy, DMIAC

#### OBSERVE

Dashboard

#### Step 3. Move toward autonomous operation

Predictive maintenance, automatic optimization, adaptive settings, hazard forecasting, and continuous improvement

#### Step 2. Turn data into decisions

Smart alerts, root cause analysis, performance loss identification, and clear recommendations with process guidance.

#### Step 1. See entire operation in real time

Throughput, energy usage, bunker filling levels, equipment performance and more - all in one dashboard.

### TAKE FULL CONTROL OF YOUR PLANT WITH BOLLEGRAAF ONE.
